

Ming Mu Ti Huang Wan
Natural Chinese Eyesight Improvement Formula

Chinese Eyes, Liver, Kidney health tonic pills. Also improves circulation to/in the eyes and other eye/body functions. Produces very clear vision.

Hard to find the original authentic formula and a chemical free product.

Many new formulas are missing ingredients and/or have new ingredients that cause side effects: herbs, sulfites, nitrites, MSG, ammonia and other chemicals that cause migraine headaches, partial temporary blind spots, lights in the visual field, visual disturbances, impairment, blur and health problems.

The true formula does not cause migraines, visual disturbances, impairment or other side effects. The true formula brings clear vision and improved health.

The only formula I have ever found that is the true, authentic, formula, no side effects and it brings my vision to better than 20/20 close and far in only 1-2 days is the one shown on this page. I purchased it after being referred to a Chinese store with a copy of the authentic bottle given to me by my Natural Vision Improvement Teacher Thomas Quackenbush when he taught on Taravel Street in San Francisco, CA. Near Golden Gate Park and ocean. Cable Car access.

The Chinese store address is shown here. I do not know if the same people run the store and sell the same formula.

This is a copy of the original bottle and ingredients.

The original box says Ming Mu Ti Huang Wan. Manufacturer says the word Ti and Di is the same but its best to buy the product that lists Ming Mu Ti Huang Wan.

Chinese Herbs Direct sells a chemical free product.

Other ingredients: Corn starch,FD&C Brown NO.5-27. 另含：澱粉，食用色素褐色5-27號。

A very good Natural Heartburn Cure is: Digestive Enzymes. Nature's Plus - Source of Life - VIBRA-GEST Live Food Plant Enzyme Supplement. Look for the Yellow Label with the picture of pineapple, fruit, grains, vegetables. Most cases of heartburn are caused by: not enough natural acid, enzymes in the stomach/system, resulting in food and the little acid that is left staying in the stomach, not digesting. Enzymes help the food to digest, clearing the food, acid from the stomach into the digestive tract and improves the absorption of food, nutrients.
